

Please let me introduce our company named “Ice pilots”, which was founded by “Murmansk shipmaster's Association” (MSMA), member of IFSMA.

We can render a service in following shipping activities in North part and Arctic region of our country:

- Ice pilotage in White, Barents seas and Northern Sea Route (NSR) for all kinds of ships which navigate under the ice breaker's assistance or not.
- Agency activity in Murmansk, Kandalaksha and other ports of Arctic region.
- Forwarding.
- All kinds of survey (Full condition survey, On hire and Off hire survey, Draught survey, Bunker survey, etc.).
- Consulting assistance to protect the ship's advantages in dealing with port authority and other locals.
- Arrangement of the cargo works on sea cost or on fast ice in Arctic seas, including loading and discharging oil by tankers.

Our professionals are employed or former masters of the transport vessels (dry cargo ships, tankers and suppliers) and ice breakers (including nuclear icebreakers). All of them have much experience in various fields of shipping.

Each ice pilot who applies for the ship is learning and should pass the test in boards of experts of MSMA for up to date ice condition on ship's route and issues of legislation including ecology. At least before departure of the ship each ice pilot obtains instruction for above mentioned matters in the Northern Sea Route Administration (NSRA).

I think that our service can be useful for You and would be grateful for your comments as soon as possible.

Yours faithfully

ICE PILOTS

Capt. Valery Antipin

Director
